# BOLTING TOOLS

GB

E 4 1 4 e

**Enerpac's Bolting Solutions caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout industry:**

### Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical alignment tools to PLC-controlled multi-point synchronous positioning systems.

### Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application. From mechanical torque multipliers to hydraulic, pneumatic and electric driven square drive wrenches, and from low profile hexagon torque wrenches to inter-connectable bolt tensioning tools; we offer the products you need for accurate and simultaneous tightening of multiple bolts.

### Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations. High quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

### Bolting Integrity Software

Visit [www.enerpac.com](http://www.enerpac.com) to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

## ATM-Series, Flange Alignment Tools

### Misaligned joints

Joints must be pulled together and correctly aligned prior to tightening. Current methods of manipulation tend to be dangerous and involve a high degree of manual lifting using slings, hooks and lifting gear. These methods can damage joint components, are time consuming in setup and disassembly, operational time and the amount of manpower required.

### Solution: Flange Alignment Tools

The Enerpac ATM-Series Flange Alignment Tools are developed to rectify twist and rotational misalignment without additional stress in pipelines. Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning.

## E-Series, Manual Torque Multipliers

### Controlled tightening when external power is unavailable

Applications are often located where external power sources to drive air or electric powered tools are unavailable but controlled bolting is required, typically at values higher than an operator can generate using manual wrenches.

### Solution: Manual Torque Multipliers

Enerpac E-Series manual torque multipliers offer a range of output torques from manual inputs that can easily be achieved by an operator, providing accurate, efficient torque multiplication for make-up or break-out of joint fasteners.

## S and W-Series, Torque Wrenches

### Industrial Applications

Controlled tightening of multiple sized fasteners for industrial applications.

### Solution: Hydraulic Torque Wrenches

Enerpac hydraulic torque wrenches are professional tools for industrial applications. Truly versatile tools which utilize standard Impact Sockets, optional direct Allen-Key Drives or interchangeable hexagon cassettes to provide controlled tightening of multiple sized fasteners per tool. Optional accessories further extend the application range of these products.

## PTW and ETW-Series, Torque Wrenches

### General Applications

Applications that require controlled bolting, feature a high volume of fastenings.

### Solution: Pneumatic and Electric Torque Wrenches

Enerpac PTW-Series pneumatic torque wrenches are fast, easy to use and highly accurate. Enerpac ETW-Series electric torque wrenches are particularly well suited for complex jobs, which demand precision and traceability.

## Controlled Bolting

Increasing Health and Safety, Environmental and Productivity requirements demand even and parallel joint closure to ensure a sound assembly, especially on pressure containing vessels. This often requires the simultaneous tightening of multiple fasteners.

## Solution: Hydraulic Bolt Tensioners

Enerpac GT-Series Bolt Tensioners can achieve accurate preload in single or multiple fastener applications simultaneously, without inducing rotational twist or contending with the uncertainties of friction and lubrication.

## GT-Series, Bolt Tensioners

## Frozen or Corroded Nuts

Often nuts are difficult to remove, while loosening using tightening tools is possible, it generally requires larger equipment and is time consuming. The use of cutting torches or hammers and chisels can cause damage to the joint components, requires significantly longer setup and operational time, and can present a potential safety risk.

## Solution: Hydraulic Nut Cutters

Nut splitting with the NC and NS-Series Hydraulic Nut Cutters is the safest method. It takes less time and avoids costly damage to joint components. The head design fitted with heavy-duty chisels permits the splitting of nuts on a wide variety of applications. With the two blades models nuts are split from two side in one action.

## NC and NS-Series, Nut Cutters

## Joint Separation

Separation of stubborn joints for inspection and maintenance, particularly those fitted with ring grooves or those with external forces acting on them are often difficult to separate. The use of hammers and wedges, chain blocks and lever bars can damage joint components and present a potential safety risk.

## Solution: Parallel Wedge Spreaders

The FSH, FSM-Series parallel wedge spreaders offer controlled separation without bending or risk of slipping from the joint. The FS-Series spreaders are ideally suited to flanged joint applications.

## FSH, FSM-Series, Wedge Spreaders

## Pumps and Accessories

A wide range of pumps and accessories are available including: manual, air and electrically operated pump units, hoses, gauges, manifolds and fittings.

## Pumps and Accessories

▼ Shown from left to right: E291, E393, E494

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Most models operator protected by anti-backlash device
- Multiplier output accuracy  $\pm 5\%$  of input torque
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate type
- Angle-of-turn protractor standard on E300 models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400 series replaceable shear drives provide overload protection of internal power train (one replacement shear drive is included).

## Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

### Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes.

### Heavy Duty Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN3129 and DIN3121 or ASME-B107.2/1995.

Page: **10**

### ▼ SELECTION CHART

Torque Multiplier Type	Output Torque Capacity		Model Number
	(Nm)	(Ft.lbs)	
Reaction Bar Multiplier	1015	750	E290PLUS
	1355	1000	E291
	1625	1200	E391
	2980	2200	E392
	4340	3200	E393
Reaction Plate Multiplier	2980	2200	E492
	4340	3200	E493
	6780	5000	E494
	10.845	8000	E495

# Manual Torque Multipliers

## Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available.

Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitive bolting applications.

## Use Reaction Bar Models:

- where space is limited
- where multiple reaction points are available
- when portability is desirable.

## Use Reaction Plate Models:

- above 3.200 Nm output torque
- on flanges and applications where neighboring bolt or nut is available to react against
- when extreme reaction forces are generated.

## E Series

Maximum Output Torque:

**1015 - 10.845 Nm**

Torque Ratio:

**3:1 - 52:1**

Multiplier Output Ratio Accuracy:

**± 5 %**

### Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

### Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring of a specific number of degrees of rotation.

### Shearable Square Drive

Provides overload protection on E300- and E400-series multiplier's power train by shearing at 103-110% of rated capacity. Internal shear pin prevents tool from falling off bolt.

### CAUTION!

Never use impact type air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Reaction Bar Type <sup>1)</sup>

Reaction Plate Type <sup>1)</sup>

## Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

<sup>1)</sup> E200 and E400-series do not have an Angle-of-Turn Protractor (scale).

User must verify manual torque wrench accuracy prior to use to ensure accurate final output torque.

▼ Shown: S3000X

## Setting New Standards in Safety, Simplicity and Performance

### Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety

### Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even with gloves on
- Includes robust handle which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening

### Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability <sup>1)</sup>

### Accuracy

- Constant torque output provides accuracy of  $\pm 3\%$  across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation.

### Two Handle Styles

Robust angled positioning handle comes standard with every S-Series (X-Edition) tool. Straight positioning handles are available

as accessories.

Compatible S-Series (X-Edition) wrenches	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
S1500X, S3000X	<b>SWH6A</b>	<b>SWH6S</b>
S6000X, S11000X	<b>SWH10A</b>	<b>SWH10S</b>
S25000X	<b>SWH10EA</b> <sup>2)</sup>	

<sup>2)</sup> SWH10EA is an eyebolt handle.

### TSP - Pro Series Swivel

The optional tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

### How to Order <sup>1)</sup>

Factory fitted to S-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool model number, example: **S1500PX**.

Order as an accessory using the model number: **TSP300**, which can be fitted to existing S-Series (X-Edition) wrenches. Includes male and female couplers.

Page: **9**

### ATEX declared. Calibration certificate included.

All X-edition tools are CE - ATEX declared and are shipped complete with a calibration certificate.

<sup>1)</sup> TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on [www.enerpac.com](http://www.enerpac.com)

# X-Edition, Square Drive Torque Wrenches

Standard are: ① ② ⑥ ⑧  
Other items are optional.

- ① Drive Unit
- ② Angeled Positioning Handle
- ③ Straight Positioning Handle
- ④ Pro Series Swivel
- ⑤ Reaction Tube Extension
- ⑥ Standard Reaction Arm
- ⑦ Allen Drive
- ⑧ Square Drive
- ⑨ Short Reaction Arm
- ⑩ Extended Reaction Arm

**Select the Right Torque**  
Choose your Enerpac Torque Wrench using the untightening rule of thumb:  
Loosening torque equals about 250% of tightening torque.

## S Series X-Edition

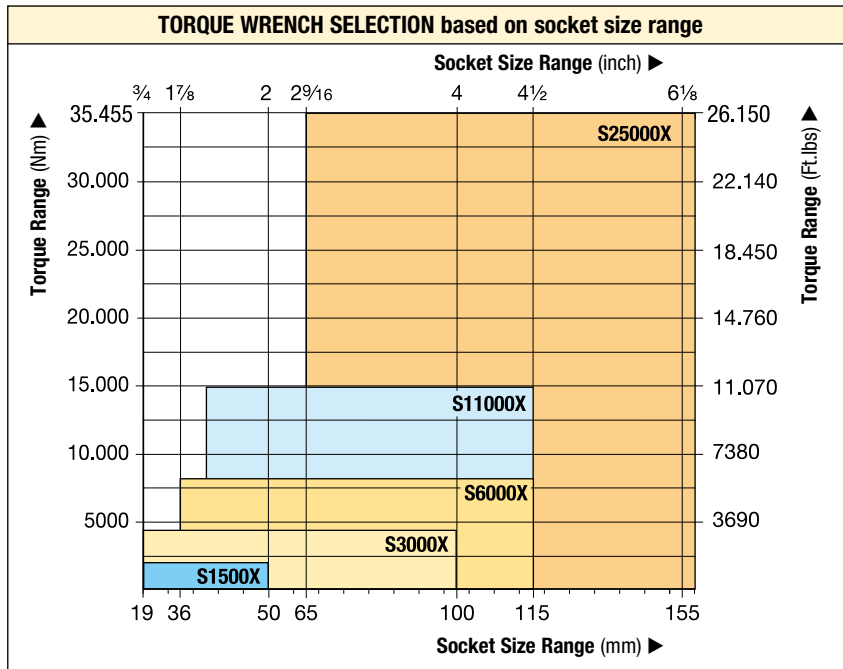

Maximum Torque Output:  
**35.455 Nm**

Square Drive Range:  
**3/4 - 2 1/2 inch**

Nose Radius:  
**25 - 64 mm**

Maximum Operating Pressure:  
**690 bar**

### Accessory Options

A full list of optional accessories is available for maximum versatility.

Page: 9

▼ The rigid steel design of the S-Series torque wrenches provides durability, reliability and safety.

**Use only Heavy Duty Impact Sockets**  
For power driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

## BSH Series

Hexagon Size:

**19 - 155 mm, ¾" - 6 ⅛"**

### Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Page: 79

### Hexagon Bolt and Nut Sizes

See the table of hexagon sizes of bolts, nuts and related thread diameters.

Enerpac professional series steel torque wrenches provide reliable controlled tightening solutions across the industry.

### ***S3000X Square Drive Torque Wrench on wind tower erection and maintenance***

*S3000X used to connect wind tower segments during assembly and maintenance. A robust but compact solution is required for tightening of bolts on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained. The Enerpac S-Series wrench was selected as it offers simple and reliable operation while providing accurate and repeatable results.*

### ***W4000X Low Profile Torque Wrench on an API Pipe Flange***

*Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting. The restricted access on this flange was easily overcome with an Enerpac W-Series Torque Wrench. These wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.*

### ***S3000X on an oil and gas flange***

*During maintenance quick turnaround times are essential; S-Series wrenches are chosen as they provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.*

▼ Shown: W4206X hexagon cassette with W4000X drive unit (rear model shows optional straight handle)

## Setting New Standards in Safety, Simplicity and Performance

### Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety

### Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Quick and easy disassembly for maintenance without special tools
- Include robust handle which mounts on both sides and the tops of cassettes to allow for extra maneuverability

### Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability <sup>1)</sup>
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools <sup>1)</sup>
- Drive unit compatible with UltraSlim and WCR-Series cassettes

### Accuracy

- Constant torque output provides accuracy of  $\pm 3\%$  across full stroke.

#### Two Handle Styles

Robust angled positioning handle comes standard with every W-Series (X-Edition) cassette.

Straight positioning handles designed for extreme limited access applications are available as accessories.

Compatible with W-Series (X-Edition) Cassettes	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
W2000X, W4000X	<b>SWH6A</b>	<b>SWH6S</b>
W8000X, W15000X	<b>SWH10A</b>	<b>SWH10S</b>
W22000X, W35000X	<b>SWH10EA</b> <sup>2)</sup>	

<sup>2)</sup> SWH10EA is an eyebolt handle.

#### TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

#### How to Order <sup>1)</sup>

Factory fitted to W-Series (X-Edition) drive units: Insert a "P" prior to the "X" in the tool model number, example: **W2000PX**.

Order as an accessory using the model number: **TSP300**, which can be fitted to existing W-Series (X-Edition) drive units. Includes male and female couplers.

Page: 25

#### ATEX declared. Calibration certificate included.

All X-edition tools are CE - ATEX declared and are shipped complete with a calibration certificate.

<sup>1)</sup> TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on [www.enerpac.com](http://www.enerpac.com)

# Double-Acting Hydraulic Hexagon Torque Wrenches

- ① Hexagon Cassette (pages 14-21)
- ② Drive Unit (page 13)
- ③ Angled Positioning Handle (page 12)
- ④ Straight Positioning Handle (page 12)
- ⑤ Pro Series Swivel (page 25)
- ⑥ Extended Reaction Arm (page 25)
- ⑦ Reducer Insert (pages 14-21)
- ⑧ Reaction Paddle (page 25)

Items ① to ③ are standard.  
Items ④ to ⑧ are optional.

## W Series X-Edition

Maximum Torque at 690 bar:  
**47.454 Nm**

Hexagon Range:  
**30 - 155 mm, 1 1/16 - 6 1/8"**

Nose Radius:  
**31 - 115 mm**

Maximum Operating Pressure:  
**690 bar**

### Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: **40**

*These rigid steel wrenches with low profile interchangeable hexagon cassettes guarantee durability and maximum versatility in bolting applications. ▶*

## W Series X-Edition

Maximum Torque at 690 bar:

**47.454 Nm**

Hexagon Range:

**3 1/8 - 6 1/8 inch**

Maximum Operating Pressure:

**690 bar**

### Hexagon Bolt and Nut Sizes

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: 82

# W-Series, Metric Cassettes and Reducers

Hexagon Range:  
**24 - 105 mm**

Maximum Operating Pressure:  
**690 bar**

**W**  
Series  
X-Edition

# W-Series, UltraSlim Bi-Hexagonal Cassettes

**ENERPAC**   
POWERFUL SOLUTIONS. GLOBAL FORCE.

▼ W4206SL bi-hexagonal cassette with W4000X drive unit

## Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas
- Uses same drive unit as standard W-series hexagon cassettes

## Performance

- Premium components provide best-in-class endurance compared to other limited access tools

## Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Top mounted straight handle for improved tool handling and safety

## Accuracy

- Constant torque output provides accuracy of  $\pm 3\%$  across the full stroke
- Calibration certificate shipped with every cassette.

**Your easy and long lasting solution to difficult access bolting applications**

### UltraSlim: Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

### Built to Outperform

High endurance components keep working when others fail.

### Top Mounted Straight Handle

The top mounted straight handle is standard and provides safe and easy positioning and access to hard to reach fasteners.

Straight handle (standard)	<b>SWH6S</b>
Angled handle (optional)	<b>SWH6A</b>

### ATEX declared. Calibration certificate included.

All UltraSlim Series cassettes are CE - ATEX declared and are shipped complete with a calibration certificate.

  II 2 GD T4

*Slim enough to fit and tough enough to last.  
This UltraSlim wrench is the perfect controlled  
bolting solution for this oil and gas flange. ►*

# UltraSlim Stepped Width Cassettes

## UltraSlim Bi-Hexagonal Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest grade materials, perfecting the geometry, and placing the positioning handle on top of the tool for safe fastening, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability\*.

## Durability of Key Components \*

\* Average test results, whereby three Enerpac 46 mm UltraSlim cassettes and three competitor 46 mm cassettes were tested at 5425 Nm for 50,000 cycles. The Enerpac side plates never broke for the full duration of the test.

## W-SL Series UltraSlim

Maximum Torque Output:

**5911 Nm**

Bi-Hexagonal Range:

**46 - 75 mm**

Maximum Operating Pressure:

**690 bar**

## Torque Wrench Pumps Selection Matrix

Visit [enerpac.com](http://enerpac.com) for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

Page: 40

## Torque Wrench Hoses

Use Enerpac THQ-700 Series torque wrench hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

6 m long, 2 hoses	<b>THQ-706T</b>
12 m long, 2 hoses	<b>THQ-712T</b>

\* Bi-Hexagonal Cassette includes top mounted straight handle.

\*\* Cassette may also be used with W2000PX and W4000PX drive units, featuring double-swivel manifolds. Weight of drive unit W2000X = 1,4 kg; W4000X = 2,0 kg.

# WCR-Series, Roller Cassette Torque Wrench

▼ WCR4000 Roller Cassette with Spanner and W4000X Drive Unit

- Provides a safe and reliable controlled bolting solution for flanges with limited access
- Spanners available to fit most commonly used API flanges
- Small nose radius – resolves bolt to pipe restrictions
- Slim spanner design – reduces bolt height restrictions
- Wide range of spanners ranging from 36 - 80 mm (1<sup>7</sup>/<sub>16</sub> - 3<sup>1</sup>/<sub>8</sub> inch)
- Includes handle to improve tool handling and safety
- Rigid steel body for maximum endurance and minimum downtime.

Bi-Hexagonal Spanner Size:

**36 - 80 mm, 1<sup>7</sup>/<sub>16</sub> - 3<sup>1</sup>/<sub>8</sub>"**

Spanner Nose Radius:

**31 - 55 mm**

Maximum Torque:

**5762 Nm (4250 Ft.lbs)**

Maximum Operating Pressure:

**690 bar**

### WCR-4000 Applications

The WCR4000 helps resolve narrow clearance restrictions in bolting of API and BOP flanges.

The Enerpac WCR4000 Roller Cassette has been developed for applications where there are severe clearance restrictions, particularly in height above the nut or between the bolt center and the inside of the joint.

Powered by the standard W4000X drive unit which is compatible with standard W-Series hexagon cassettes. The WCR-wrench must be removed and repositioned after each wrench cycle by operating the pump in the retract direction. The tool contains no spring return.

Closed Spanner Hexagon Size S (inch)   (mm)	Closed Spanner Model Number	Maximum Torque (Nm)	Spanner Radius R (mm)	 * (kg)	Roller Cassette Assembly Model Nr.	Drive Unit Model Nr.
1 <sup>7</sup> / <sub>16</sub>   36	W4107CS	5762	31	1,9	WCR4000	W4000X
1 <sup>1</sup> / <sub>2</sub>   38	W4108CS	5762	33	2,0

3 <sup>1</sup> / <sub>8</sub>   80	W4302CS	5762	55	2,2		

\* Spanner weight. For total weight add 6,3 kg for WCR4000 and 2,0 kg for W4000X.

# Accessories for W-Series, X-Edition Wrenches

Items ① to ③ are standard.  
Items ④ to ⑧ are optional.

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle
- ⑤ Pro Series Swivel
- ⑥ Extended Reaction Arm
- ⑦ Reducer Insert
- ⑧ Reaction Paddle

## TSP WTE WRP Series

### TSP-Series, Pro Series Swivel

- Robust interlocking design
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers.

For Torque Wrench Model Number	Model Number <sup>1)</sup>	Maximum Pressure (bar)	Weight (kg)
W2000X, W4000X, W8000X, W15000X, W22000X, W35000X	TSP300	690	0,2

<sup>1)</sup> To order a W-Series (X-edition) drive unit fitted with a TSP300 tilt and swivel manifold, insert a "P" prior to the "X" in the tool model number, example: **W2000PX**.  
TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools.  
For replacement components for existing tools, refer to repair sheet on [www.enerpac.com](http://www.enerpac.com)

### WTE-Series, Extended Reaction Arms

- Full torque rated
- Increases tool fit in restricted access areas.

For Torque Wrench Model Number	Model Number	Dimensions (mm)			Weight (kg) *
		A	B	C	
W2000X	WTE20	56	398	76	2,6
W4000X	WTE40	66	436	74	4,6
W8000X	WTE80	85	449	55	7,6
W15000X	WTE150	102	498	72	12,0
W22000X	WTE220	114	524	77	17,3
W35000X	WTE350	127	419	133	17,8

\*Weights indicated are for the accessories only and do not include the wrench.

### WRP-Series, Reaction Paddles

- Lightweight interchangeable design
- Allows for offset reaction when in-line reaction is not available.

For Torque Wrench Model Nr.	Model Number	Dimensions (mm)					Weight (kg) *
		A	B	C	D	E	
W2000X	WRP20	84	16	35	45	148	0,4
W4000X	WRP40	109	21	47	59	190	0,8

W35000X	WRP350	225	42	91	182	367	10,6

\*Weights indicated are for the accessories only and do not include the wrench.

▼ Shown: SQD-50-I

## Lightweight Aluminium High-Power Wrench for Sockets or Allen Drives

- Very high torque-to-weight ratio
- High speed, double-acting operation
- High degree of rotation angle for increased productivity
- Never-jam mechanism
- High repeatability, with accuracy  $\pm 3\%$
- Slim nose radius and 360° swivel hose connection allow easier positioning in confined areas
- Few moving parts means durability and low maintenance
- Push-button drive release; no tools needed to reverse square or Allen drives for tightening or loosening
- Storage case (included) protects from damage, water and dirt
- Lock-ring couplers are standard on all torque wrenches, pumps and hoses.

◀ Easy and reliable service in the field using Enerpac SQD-Series torque wrenches.

### Swivel Hose Connection

All Enerpac torque wrenches feature a 360° swivel connection to allow easy access in all positions.

### Twin 3,5:1 Safety Hoses

Use only Enerpac THC-700 series twin 3,5:1 safety hoses with SQD-Series double-acting wrenches to ensure the integrity of your system.

Length 6 m, 2 hoses	<b>THC-7062</b>
Length 12 m, 2 hoses	<b>THC-7122</b>

### Optional Allen-Key Drives

Expanded versatility with a wide range of metric and imperial Allen-Key drives.

# Double-Acting, Square Drive Hydraulic Wrenches

▲ All wrenches come standard with swivel coupler, square drive and reaction arm.

## SQD Series

Maximum Torque:  
**27.000 Nm**

Square Drive Range:  
**3/4 - 2 1/2 inch**

Maximum Operating Pressure:  
**800 bar**

Use only heavy-duty Impact Sockets for power driven torquing equipment, according to ISO 2725 and ISO 1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Page: 10

### Torque Wrench Pumps and Hoses

Enerpac system matched air and electric torque wrench pumps provide control to operate hydraulic torque wrenches.

Page: 40

### Hexagon Bolt and Nut Sizes

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: 82

## For SQD Series

Maximum Torque at 800 bar:

**27.000 Nm**

Allen Drive Range:

**14 - 70 mm**

Nose Radius:

**24 - 59 mm**

### Optional Allen-Key Drives and Reaction Arm

The RAH-Reaction Arm for Allen drives must be used instead of reaction arm for square drives.

### Flange Spreaders

Separates pipe flanges with ease, enabling efficient maintenance tasks.

Page: **68**

### Select the Right Torque

Choose your Enerpac Torque Wrench using the loosening torque rule of thumb: Loosening torque may require 250% of tightening torque depending on the condition of the fastener.

▼ SQD-50-I with 50A-22 Allen drive with RAH-50 Reaction Arm for Allen drives.

▼ HXD-60 with CC-680

- High torque-to-weight ratio, slim nose radius and flat design
- High speed, high degree of rotation angle
- Snap in, interchangeable cassettes, no tools required
- 360° swivel hose connection allows easier positioning in confined areas
- High repeatability, with accuracy  $\pm 3\%$
- Strong unibody design, integrated reaction arm and few moving parts make wrenches durable and reliable
- Extensive range of metric and imperial hexagon cassettes and reducers
- Drive unit and cassette come in storage case to protect from damage, water and dirt
- Lock-ring couplers are standard.

## Aluminium, Low Profile

### Twin 3,5:1 Safety Hoses

Use only Enerpac THC-700 series twin 3,5:1 safety hoses with HXD double-acting wrenches to ensure the integrity of your system.

Page: 40

### Nut Cutters

Remove rusted or corroded nuts easily with Enerpac Nut Cutters. Cuts hexagon nut sizes up to 130 mm.

▼ PTW1000

## Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime

## Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications

## Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool.

◀ The PTW1000 makes quick work of this flange maintenance job.

## Continuous Rotation Controlled Torque

### Calibration Certificate

All PTW-Series tools are CE declared and are shipped complete with a calibration certificate.

### Typical Pneumatic Torque Wrench Applications

#### Oil and Gas, MRO

- Pipe flanges
- Valves
- Man-way covers
- Pressure vessels

#### Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

#### Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance.

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

# Pneumatic Torque Wrenches

## PTW-Series, Pneumatic Torque Wrenches

Enerpac PTW-Series Pneumatic Torque Wrenches are designed for applications that require speed and control.

The standard package includes a Torque Wrench with a calibration certificate, an FRL (Filter/Regulator/Lubricator), and a 3 m long, 1/2" inch (13 mm) diameter air hose, which connects the FRL to the wrench.

Once the air hoses are connected, the operator simply adjusts the air pressure on

the FRL to achieve the desired torque using the calibration certificate. After this, the tool is ready to go to work! \*

The air source used with the PTW system must be regulated and/or limited to 8,3 bar, and must be capable of providing a volume of at least (85 m<sup>3</sup>/h) at 6,9 bar. A separate 1/2" inch hose (not included) must be used to connect the FRL to the air supply.

\* See instruction manual for comprehensive instructions.

## PTW Series

Maximum Torque Output:

**8135 Nm**

Square Drive Range:

**1 - 1 1/2 inch**

### Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

Page: **38**

### FRL120C, Filter-Regulator-Lubricator with air hose

All PTW-Series tools are shipped complete with standard reaction arm, and Filter-Regulator-Lubricator (FRL120C).

### BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: **10**

### Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: **1**

- ① PTW Torque Wrench
- ② Standard Reaction Arm
- ③ FRL120C Filter-Regulator-Lubricator with 3 meters air hose

### ▼ SELECTION CHART

All tools are shipped complete with standard reaction arm and FRL120C.

Minimum Torque		Maximum Torque		Square Drive (inch)	Model Number <sup>1)</sup> (FRL120C included)	Speed (RPM)	Dimensions (mm)				Weight (kg) <sup>2)</sup>
(Nm)	(Ft.lbs)	(Nm)	(Ft.lbs)				A	B	C	D	
407	300	1356	1000	1	<b>PTW1000C</b>	12,6	272	83	72	130	8,2
678	500	2712	2000	1	<b>PTW2000C</b>	8,0	286	83	79	133	8,8
1220	900	4067	3000	1	<b>PTW3000C</b>	3,1	343	83	95	133	10,4
1763	1300	8135	6000	1 1/2	<b>PTW6000C</b>	2,5	366	114	127	178	17,7

<sup>1)</sup> To order without FRL120C, remove "C" suffix from model number (example: **PTW3000**).

<sup>2)</sup> Weight does not include reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 1,3 kg and for PTW6000 is 3,5 kg.

▼ ETW3000E (wrench shown only; wrench cannot be purchased or used without control box)

## Performance

- High speed continuous rotation gets the job done faster
- Torque and angle functionality allows input of nominal torque value followed by a specific angle of rotation
- Pass/Fail LED indicator on back of tool verifies fastening has been completed according to specified input.

## Simplicity

- Control box with 7-inch touchscreen simplifies tool operation
- Controls on back of wrench enable operator to monitor and manage the fastening process without returning to the control box
- Brightly lit three line LED display on wrench is easy to read in any environment, even in bright sunlight.

## Traceability

- Fastening record can be viewed on-screen and transferred through standard USB connection on the control box
- Each tool is performance tested and shipped complete with a factory calibration certificate.

## Safety

- Lift points on wrench enable use with positioning handle or lifting device for greater handling safety
- Ground fault detector protects operator in the event of insufficient grounding.

## Your Simple Solution for Smart Bolting

### Touchscreen Control Box

ETW-Series tools feature an easy to use, interactive touch-screen control box, which helps make even the most complex jobs simple to complete.

### Easy Access to Controls

Controls on back of wrench with LED display allow user to directly input desired torque, change direction of rotation, and monitor the fastening process.

### Certifications and Declarations

All ETW-Series tools:

- Are CE declared
- Are shipped complete with a calibration certificate
- Are certified for North American Electrical Safety by CSA International
- Carry a CSA US and Canada mark.

▼ ETW-Series Electric Torque Wrenches are ideal for high volume fastening applications that require precision and traceability, such as this wind tower job.

## ETW-Series, Electric Torque Wrenches

Enerpac ETW-Series Electric Torque Wrenches are particularly well suited to complex jobs which demand precision and traceability.

The ETW-Series tools feature an automatic mode, which helps simplify and automate complex jobs, including those with torque and angle specifications, through the creation of presets.

Using the touchscreen, simply input the number of fasteners and desired torque value for each fastening step, followed by the required angle of turn. This sequence may then be saved as an automatic preset for future use.

For simpler jobs, torque values may be input with a digital slider on the touchscreen, or directly into the rear control panel of the wrench.

Once the input torque is achieved, the tool stalls, and a pass/fail indicator verifies that it is ready to move on to the next fastener.

When the job is completed, the fastening record can be viewed on the touch screen, or exported to a computer via a USB connection on the control box.

7	Blank Reaction Arm **	BLTWL	Weldable blank for custom applications **	102	152	32	57

\* Time to reposition arm when repeatedly moving from tightening to loosening.

\*\* WARNING: Blank reaction arms must be heat treated to HRc 38-42 prior to use.

# Typical PTW and ETW-Series Torque Wrench Applications

## Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

## Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

## Oil & Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

## Optimum Torque Wrench and Pump Combinations

For optimum speed and performance Enerpac recommends the following system set-up with wrench-pump-hose combinations. For other combinations, consult your Enerpac bolting expert or your authorized Enerpac distributor.

### ZU4 – Electric Wrench Pumps

Utilizing a universal motor, the ZU4-Series has excellent low voltage characteristics. It works well with long extension cords or generator driven electrical power supplies. A field proven, efficient design ensures this pump is dependable and will draw less current – lowering your operating cost. ZU4-pumps are available in Pro and Classic formats.

**ZU4 Pro pumps** have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics – premium features not available on any other pump.

**ZU4 Classic pumps** feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

### ZE-Series Electric Wrench Pumps

The ZE-Series features premium options, such as the LCD to display torque or pressure values, and self-diagnostics. These pumps utilize an induction motor, making the ZE-Series the coolest and quietest pumps in their class.

### ZA-Series Air Driven Wrench Pumps

Utilizing the highly efficient design of the Z-Class pumping element, this air driven pump is best suited to power medium to large size torque wrenches.

### TQ-700 Series Electric Wrench Pumps

Designed for both portability and production, the TQ-700 features optimized flow technology to deliver superior bolting speed.

### Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For S & W	Modelnr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T
For SQD & HXD	
6 m long, 2 hoses	THC-7062
12 m long, 2 hoses	THC-7122

# Portable Electric Torque Wrench Pumps

▼ Shown: PMU-10422

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package on PMU-Series keeps pump cool under extreme use
- Glycerin filled gauge with scales reading in psi and bar
- Transparent overlays in Nm and Ft.lbs for all Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio; generates full pressure on as little as 50% of the rated line voltage
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability.

## ▼ SELECTION CHART

For Use with Torque Wrenches		Maximum Pressure Rating (bar)		Oil Flow Rate (l/min)		Model Number with Heat Exchanger *	Useable Oil Capacity (litres)	Electric Motor (Volt-phase-Hz)	Dimensions L x W x H (mm)	Weight (kg)
		1 <sup>st</sup> stage	2 <sup>nd</sup> stage	1 <sup>st</sup> stage	2 <sup>nd</sup> stage					
S1500X S3000X	W2000X W4000X	48	700	3,3	0,33	PMU-10427-Q	1,9	115 - 1 - 50/60	431x280x381	21
		48	700	3,3	0,33	PMU-10447-Q	3,8	115 - 1 - 50/60	431x330x381	24
		48	700	3,3	0,33	PMU-10422-Q	1,9	230 - 1 - 50/60	431x280x381	21
		48	700	3,3	0,33	PMU-10442-Q	3,8	230 - 1 - 50/60	431x330x381	24
SQD-25-I SQD-50-I	HXD-30 HXD-60	48	800	3,3	0,33	PMU-10427	1,9	115 - 1 - 50/60	431x280x381	21
		48	800	3,3	0,33	PMU-10447	3,8	115 - 1 - 50/60	431x330x381	24
		48	800	3,3	0,33	PMU-10422	1,9	230 - 1 - 50/60	431x280x381	21
		48	800	3,3	0,33	PMU-10442	3,8	230 - 1 - 50/60	431x330x381	24

\* For pump without heat exchanger change PMU into PME. Example **PME-10442-Q**.  
PME-Series pump size: 250 x 250 x 360 mm. Weight 18 kg (1,9 litres) and 21 kg (3,8 litres).

## PME PMU Series

Reservoir Capacity:  
**1,9 - 3,8 litres**

Flow at Rated Pressure:  
**0,33 l/min**

Motor Size:  
**0,37 kW**

Maximum Operating Pressure:  
**700 - 800 bar**

### Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model-Nr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T
For 800 bar	
6 m long, 2 hoses	THC-7062
12 m long, 2 hoses	THC-7122

### Gauge and Overlay Kit

Available separately for use with PME, PMU-Series pumps:  
**GT-4015Q** includes gauge and overlays for all S- and W-Series wrenches. **GT-4015** includes gauge and overlays for all SQD and HXD-Series wrenches.

▼ ZU4204TE-Q (Pro Electric serie), ZU4204BE-Q (Classic Electric serie)

## Z Tough, Dependable Innovative CLASS

### Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with electro-mechanical push buttons, 24V transformer timer and operator accessible circuit breaker.

- Features Z-Class high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Pendant provides additional safety for the operator.

### Pro Series pumps only

- LCD readout provides pressure display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without auto cycle).

### Pro-Series Pump Models

Back-lit LCD and Pressure Transducer featuring Auto-Cycle Technology.

- Digital read-out and "Autocycle" setting
- Display pressure (bar, MPa, psi) or torque (Nm, Ft.lbs) read-out
- Torque wrench model is selectable
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display.

◀ Any brand of hydraulic torque wrench can be powered by the portable ZU4T-Series torque wrench pump.

# ZU4T-Series, Torque Wrench Pumps

## Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high by-pass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools. Enerpac ZU4T-Series pumps are built to power small to large torque wrenches. Choosing the right ZU4T-Series torque wrench pump for your application is easy.

### Classic Electric Torque Wrench Pumps

- The Classic has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic delivers durable, safe and efficient hydraulic power.

### Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure display and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump – anywhere!
- Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without Auto-Cycle feature).

## ZU4T Series

Reservoir Capacity:

**4,0 - 8,0 litres**

Flow at Rated Pressure:

**1,0 l/min**

Motor Size:

**1,25 kW**

Maximum Operating Pressure:

**700 - 800 bar**

### Torque Wrench Pump Selection

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: **40**

### COMMON PUMP MODELS

For Use With Torque Wrenches	Model Number <sup>1) 4)</sup>	Motor Electrical Specification	Usable Oil Capacity (litres)	(kg)
Pro Series pumps All wrenches	ZU4204TB-Q	115 VAC, 1-ph	4,0	32

### 1 Product Type

**Z** = Pump series

### 2 Motor Type

**U** = Universal electric motor

### 3 Flow Group

**4** = 1,0 l/min @ 700 bar

### 4 Valve Type

**2** = Torque wrench valve

### 5 Reservoir Size

**04** = 4,0 litres usable oil

**08** = 8,0 litres usable oil

### 6 Valve Operation

**T** = Pro Electric Serie pump with solenoid valve and pendant, LCD Electric and pressur transducer

**B** = Classic Electric pump with solenoid valve and pendant.

### 7 Voltage

**B** = 115V, 1 ph, 50/60 Hz

**E** = 208-240V, 1 ph, 50/60 Hz (with European plug CE RF compliant)

**I** = 208-240V, 1 ph, 50/60 Hz (with NEMA 6-15 plug)

### 8 Options

**E** = with 800 bar coupler for use with HXD and SQD-Series or other wrenches

**Q** = with 700 bar coupler for use with S and W-Series or other wrenches

**H** = Heat exchanger

**K** = Skid bar

**M** = 4-wrench manifold

**R** = Roll cage

### How to order your ZU4T-Series torque wrench pump

Ordering Example

Model No. **ZU4208TE-QMHM**

**700 bar Pro Electric Series** pump for use with Enerpac S and W-Series and other 700 bar torque wrenches, 230V motor, 8 litres reservoir, 4-wrench manifold, heat exchanger and skidbar.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Page: **40**

### ZU4T-Series Torque Wrench Pumps

- ① User adjustable relief valve
- ② Heat Exchanger (optional)
- ③ Skidbar (optional)
- ④ 4-wrench manifold (optional)
- ⑤ Roll cage (optional)

### Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model Nr.
6 m long, 2 hoses	<b>THQ-706T</b>
12 m long, 2 hoses	<b>THQ-712T</b>
For 800 bar	
6 m long, 2 hoses	<b>THC-7062</b>
12 m long, 2 hoses	<b>THC-7122</b>

### ZU4T-Series Performance Chart

Motor Size (kW)	Output Flow Rate (l/min)				Motor Electrical Specification (Volt - Phase - Hz)	Sound Level (dBA)	Relief Valve Adjustment Range (bar)
	7 bar	50 bar	350 bar	700 bar			
1,25	11,5	8,8	1,2	1,0	115 - 1 - 50/60 208-240 - 1 - 50/60	85-90	124-700 *

\* Pump type (-Q) shown, (-E) range is 124-800 bar.

# ZU4T-Series, Pump Options

## Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
<b>ZHE-U115</b>	115 Volt pumps
<b>ZHE-U230</b>	230 Volt pumps

\* Add suffix **H** to pump model number for factory installation.

Heat Exchanger adds 4,1 kg to pump weight.

Ordering Example: **ZU4208TE-QH**

## Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
<b>SBZ-4</b>	04 and 08 reservoir <sup>1)</sup>
<b>SBZ-4L</b>	04 and 08 reservoir <sup>2)</sup>

\* Add suffix **K** to pump model number for factory installation.

<sup>1)</sup> For pump without heat exchanger 2,2 kg.

<sup>2)</sup> For pump with heat exchanger 3,2 kg.

Ordering Example: **ZU4208TE-QK**

## Roll Cage

- Protects pump
- Provides greater pump stability.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
<b>ZRC-04</b>	04 and 08 reservoir <sup>1)</sup>
<b>ZRC-04H</b>	04 and 08 reservoir <sup>2)</sup>

\* Add suffix **R** for factory installation.

<sup>1)</sup> For pump without heat exchanger 5 kg.

<sup>2)</sup> For pump with heat exchanger 7 kg.

Ordering Example: **ZU4208TE-QR**

## 4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
<b>ZTM-E</b>	for 800 bar torque wrenches
<b>ZTM-Q</b>	for 700 bar torque wrenches

\* Add suffix **M** for factory installation.

Weight 4,0 kg.

Ordering Example: **ZU4208TE-QM**

## ZU4T Series

Reservoir Capacity:

**4,0 - 8,0 litres**

Flow at Rated Pressure:

**1,0 l/min**

Motor Size:

**1,25 kW**

Maximum Operating Pressure:

**700 - 800 bar**

	800	ZE5204TW-EHR	400 - 3 - 50/60	4,0	62

<sup>1)</sup> Larger reservoirs (8, 10, 20 and 40 litres) are available. Contact Enerpac.

▼ PERFORMANCE CHART

Pump Series	Output Flow Rate at 50 Hz <sup>2)</sup> (l/min)				Motor Size (kW)	Relief Valve Adjustment Range (bar)	Sound Level (dBA)
	7 bar	50 bar	350 bar	700 bar			
ZE4T	8,8	8,1	0,9	0,8	1,1	70 - 800	75
ZE5T	11,8	11,2	1,7	1,6	2,2	70 - 800	75

<sup>2)</sup> Flow rate will be approximately 6/5 higher at 60 Hz.

**ZE Series**

Reservoir Capacity:  
**4,0 - 40 litres**

Flow at Rated Pressure:  
**0,82 - 1,64 l/min**

Motor Size:  
**1,1 - 2,2 kW**

Maximum Operating Pressure:  
**700 - 800 bar**

**Torque Wrench Pump Selection**

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: **40**

**Torque Wrench Hoses**

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model Nr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T
For 800 bar	
6 m long, 2 hoses	THC-7062
12 m long, 2 hoses	THC-7122

**4-Wrench Manifold**

For simultaneous operation of multiple torque wrenches.

4-Wrench Manifold	Model Nr.
for 700 bar torque wrenches	ZTM-Q
for 800 bar torque wrenches	ZTM-E

▼ TQ-700E

- **Optimized flow technology – three stage pump maximizes productivity of the pump and tool while minimizing heat build-up and down time**
- **Heat exchanger is standard included**
- **A quiet (<85 dBA), lightweight pump with a compact footprint – easy to move around and through the work site**
- **Durable roll cage with an ergonomically sized handle and shielded gauge – a pump that is easy to put into position and safe from on site operational hazards**
- **Maintenance made simple with a brushless motor designed for continuous usage**
- **Straightforward operation with a simple pressure set and convenient to use 6 m pendant control – immediate productivity for crews operating the pump**
- **IP55 Rating for superior dust and water protection**
- **Transparent gauge overlays in Nm and Ft.lbs for all Enerpac S and W-Series torque wrenches provide a quick torque reference.**

## Lightweight Torque Wrench Pumps

### Four Port Manifold

The TQ-700E offers an optional four wrench manifold as an accessory factory installed. (Add suffix "M" at the end of the model number. For example: **TQ-700EM**).

### Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page:  1

### Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 700 bar pumps.

For 700 bar	Model Nr.
6 meters long, 2 hoses	<b>THQ-706T</b>
12 meters long, 2 hoses	<b>THQ-712T</b>

*The TQ-700E and the W-Series wrenches are a productive combination in wind power applications. ►*

# Electric Torque Wrench Pumps

## TQ-700 Applications

The TQ-Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets. The TQ-700 has been engineered with Optimized Flow Technology to deliver up to 50% faster bolt tightening than competing pumps.

Bolting speed is more complex than how much oil flow per minute the pump produces. The key is optimizing the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system. The result of this optimized flow is more bolts tightened faster and a more productive work team.

*Internal laboratory testing based on standard torqueing procedure on a pipe flange with 14, 1 7/8" bolts.*

## TQ Series

Reservoir Capacity:  
**4,0 litres**

Flow at Rated Pressure:  
**0,5 l/min**

Motor Size:  
**0,75 kW**

Maximum Operating Pressure:  
**700 bar**

### Torque Wrench Pump Selection

For optimum speed and performance see the torque wrench, pump and hose selection matrix.

Page: 40

For Use with Torque Wrenches	Pressure Rating (bar)	Model Number <sup>1)</sup>	Useable Oil Capacity (litres)	Motor Size (kW)	Motor Electrical Specifications (Volt - Ph - Hz)	Sound Level (dBA)	Weight (kg)
All S and W-Series	700	<b>TQ-700B</b>	4,0	0,75	115 - 1 - 50/60	82 - 85	31
	700	<b>TQ-700E</b> <sup>2)</sup>	4,0	0,75	230 - 1 - 50	82 - 85	30
	700	<b>TQ-700I</b> <sup>3)</sup>	4,0	0,75	230 - 1 - 60	82 - 85	30

<sup>1)</sup> All models meet CE safety requirements and all TÜV requirements.

<sup>2)</sup> TQ-700E with European plug and CE EMC directive compliant.

<sup>3)</sup> TQ-700I with NEMA 6-15 plug.

▼ The TQ-700E and the W-Series wrenches are a productive combination.

▼ PTA-1404

- Compact and portable
- Handle located directly over pump's center of gravity for greater ease in carrying
- High bypass (125 bar) for faster torque cycles
- High power-to-weight ratio suits all Enerpac torque wrenches
- Glycerine filled pressure gauge with scales reading in bar/psi
- Transparent overlays in Nm and Ft.lbs for all Enerpac torque wrenches provide a quick torque reference
- Internal safety relief valve, factory preset.

◀ *The compact PTA-Series pumps may easily be transported to jobsites, and are ideal for powering Enerpac torque wrenches such as this W-Series low profile tool.*

## Two-Stage Power in a Portable Design

### Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model Nr.
6 m long, 2 hoses	<b>THQ-706T</b>
12 m long, 2 hoses	<b>THQ-712T</b>
For 800 bar	
6 m long, 2 hoses	<b>THC-7062</b>
12 m long, 2 hoses	<b>THC-7122</b>

### Gauge and Overlay Kit

Available separately for use with PTA-Series pumps: **GT-4015Q** includes gauge and overlays for all S and W-Series wrenches.

**GT-4015** includes gauge and overlays for all SQD and HXD-Series wrenches.

# Compact Pneumatic Torque Wrench Pump

## PTA Series

Reservoir Capacity:

**3,8 litres**

Flow at Rated Pressure:

**0,33 l/min**

Air Consumption:

**1133 l/min**

Maximum Operating Pressure:

**700 - 800 bar**

- ① 5 mtr Air control pendant
- ② Vent/Fill plug
- ③ Externally adjustable relief valve
- ④ 1/4" - 18 NPTF Hydraulic ports
- ⑤ 3/8" - 18 NPTF Air inlet
- ⑥ Gauge with overlay kit

### Torque Wrench Pump Selection

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: **40**

# ZA4T-Series, Air Driven Torque Pumps

▼ ZA4204TX-ER

- Two-speed operation and high by-pass pressure reduces cycle time for improved productivity
- Glycerin filled pressure gauge with transparent overlays in Nm and Ft.lbs for Enerpac torque wrenches provide a quick torque reference
- Standard Regulator-Filter-Lubricator with removable bowls and auto drain
- Heat exchanger warms exhaust air to prevent freezing and cools the oil
- Ergonomic pendant allows remote operation up to 6 m.

## Complete 700 bar Pump-Hose Set ZA4208TX-QRU105

- Fine air pressure adjustment for very accurate torque control
- Improved wrench performance at low pressure
- Standard with THQ706T twin hose.

# Z

### Gauge and Overlay Kit

Available separately for use with ZA4T-Series pumps: **GT-4015Q** includes gauge and overlays for all S- and W-Series wrenches.

**GT-4015** includes gauge and overlays for all SQD and HXD-Series wrenches.

### Torque Wrench Pump Selection

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: **40**

◀ Most hydraulic torque wrenches can be powered by the Enerpac ZA4T-Series torque wrench pump.

# Air Driven Torque Wrench Pumps

## Pump Applications

The ZA4T-Series pump is best suited to power medium to large size torque wrenches.

Patent-pending Z-Class technology provides high by-pass pressures for increased productivity. Its high power to weight ratio and compact design make it ideal for applications which require easy transport of the pump.

All ZA4T-Series pump models meet CE, CSA and TÜV safety requirements. For further application assistance contact your local Enerpac office.

## ATEX 95 Certified

The ZA4T-Series pumps are tested and certified according to the Equipment Directive 94 / 9 / EC "ATEX Directive".

The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ZA4T-Series pumps are marked with: Ex II 2 GD ck T4.

## ZA4T Series

Reservoir Capacity:

**4,0 - 8,0 litres**

Flow at Rated Pressure:

**0,8 - 1,0 l/min**

Air Consumption:

**600 - 2840 l/min**

Maximum Operating Pressure:

**700 - 800 bar**

## Accessory Options

Available by placing the following additional suffix at the end of the model number:

- K** = Skid bar
- M** = 4-wrench manifold
- R** = Roll cage.

Page: **53**

## OIL FLOW VERSUS PRESSURE

6,9 bar dynamic air pressure at 2840 l/min

## COMMON PUMP MODELS

\*\* ZA4208TX-QRU105 only.

▼ Most hydraulic torque wrenches can be powered by the Enerpac ZA4T-Series torque wrench pump.

# ZA4T-Series, Pump Options

## Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
<b>SBZ-4</b>	04 and 08 reservoir

\* Add suffix **K** for factory installation.  
Weight skid bar 2,2 kg.  
Ordering Example: **ZA4208TX-QK**

## 4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
<b>ZTM-E</b>	for 800 bar wrenches
<b>ZTM-Q</b>	for 700 bar wrenches

\* Add suffix **M** for factory installation.  
Weight manifold 4,5 kg.  
Ordering Example: **ZA4208TX-QM**

## ZA4T Series

Reservoir Capacity:

**4,0 - 8,0 litres**

Flow at Rated Pressure:

**0,8 - 1,0 l/min**

Air Consumption:

**600 - 2840 l/min**

Maximum Operating Pressure:

**700 - 800 bar**

## 700 bar Spin-on Couplers

Model-Nr: TH-630 male coupler  
TR-630 female coupler

- Mounted on:
  - Torque wrench pumps with suffix "Q"
  - S and W-Series wrenches
  - THQ-Series hoses
  - 4-Wrench manifold ZTM-Q.

## 800 bar Lock-ring Couplers

Model-Nr: CMF-250 male coupler  
CFF-250 female coupler

- Mounted on:
  - Torque wrench pumps with suffix "E"
  - HXD and SQD-Series wrenches
  - THC-Series hoses
  - 4-Wrench manifold ZTM-E.

## Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
<b>ZRC-04</b>	04 and 08 reservoir

\* Add suffix **R** for factory installation.  
Roll cage weight 3,4 kg.  
Ordering Example: **ZA4208TX-QR**

## Accurate & Reliable Extreme Performance Bolt Tensioner

### Tensioning Pumps, Hoses and Couplers

High pressure pumps, hoses and fittings matched for use with the Enerpac GT-Series Bolt Tensioning system.

Page: 59

### Minimum Stud Protrusion

Page: 80

- Six load cells from M16 to M95 or from 5/8" to 3 3/4"
- Twin ports for quick connection of multiple tools
- Only one size of bridge per size of load cell
- Detachable and rotational bridge simplifies tool positioning
- Full bridge window
- Piston stroke indicator
- Black surface treatment protects against corrosion
- Anti-slip grip for more secure handling
- Universal and multi-use tool.

## GT Series

Bolt Range:

**M16 - M95, 5/8" - 3 3/4"**

Maximum Load:

**2845 kN**

Maximum Operating Pressure:

**1500 bar**

### How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from Adaptor Kits.

Example, to order a complete tensioner for a M36 x 4 threaded bolt order:

1 x Load Cell and Bridge: **GT2-LCB**

1 x Adaptor Kit: **GT2PM-NRS03640**

### Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity at [www.enerpac.com](http://www.enerpac.com)

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools.

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

▼ ZUTP-1500E

## ZUTP Series

Reservoir Capacity:  
**4,0 litres**

Flow at Rated Pressure:  
**0,13 l/min**

Maximum Operating Pressure:  
**1500 bar**

- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for safe and accurate operation
- 6 m pendant cord enables motor control from a distance
- Angled 153 mm pressure gauge, with polycarbonate cover, built into a protective metal shroud for improved visibility and protection
- Safety relief valve limits output pressure
- Compact, lightweight and rugged aluminium frame for increased durability and ease of handling.

### Applications

The Enerpac ZUTP-Series electric pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

Page: **56**

### 1500 bar hoses and couplers

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: **59**

### Bolting Theory

See our 'Yellow Pages' for information on torque tightening and tensioning.

Page: **72**

<sup>1)</sup> All models meet CE safety requirements and all TÜV requirements.

<sup>2)</sup> European plug and CE EMC directive compliant.

<sup>3)</sup> With NEMA 6-15 plug.

# High Pressure Hand Pump and Accessories

▼ HPT-1500

- Lightweight and portable high-pressure hand pump
- Two-speed operation displaces a larger volume of oil per stroke, reducing cycle times for many testing applications
- Includes a pressure gauge and coupler for direct connection to Enerpac GT-Series Bolt Tensioners
- Integrated relief valve set at 1500 bar.

## HPT, HT, B Series

Reservoir Capacity:

**2,5 litres**

Flow at Rated Pressure:

**0,61 cm<sup>3</sup>/stroke**

Maximum Operating Pressure:

**1500 bar**

### Ultra-high pressure

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

### Applications

The hand pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

Page: **56**

### 1500 bar ULTRA-HIGH PRESSURE PUMP

# Ultra-High Pressure Air Pump

▼ ATP-1500

- General purpose, high pressure air driven two speed pump unit for products requiring up to 1500 bar hydraulic pressure
- Compact, lightweight, rugged steel frame for protection and easy handling
- Pre-lubricated pump element, does not require an airline lubricator
- Easily adjustable output pressure control
- Integrated and protected easy to read glycerin filled gauge
- Safety relief valve limits output pressure.

- Shut-off Valve
  - Outlet Port 1/4" BSPM with BR-150 female coupler
  - Filter/Regulator
  - Air On/Off Valve
- Air Inlet 1/2" NPTF

## 1500 bar HIGH PRESSURE AIR PUMP

Pump Type	Useable Oil Capacity (litres)	Pressure Rating (bar)	Model Number	Output Flow Rate at 0 bar (l/min)	Output Flow Rate at 1500 bar (l/min)	Air Pressure Range (bar)	Air Consumption (l/min)	Sound Level (dBA)	 (kg)

Flow (l/min) at 6,2 bar air input

# Power Box – Portable Tool Sets

▼ SCR154PGH

- Easy to carry sturdy tool box
- Complete and ready-to-use hydraulic sets
- Includes a single-acting cylinder, two-speed lightweight hand pump, gauge adaptor assembly, 1,8 m hose and couplers.

**SC,  
SL,  
SR,  
SW  
Series**

Capacity:

**1 - 45 ton**

Stroke:

**11 - 156 mm**

Maximum Operating Pressure:

**700 bar**

#### Gauge Adaptor Assembly

Power Box Sets include 45 degree angled gauge adaptor assembly for improved safe working conditions.

	Cylinder Model	Cylinder Stroke (mm)	Cylinder Capacity ton (kN)	 Weight (kg)	Power Box Model Number

## The Quickest and Easiest Way to Start Working Right Away

### LW-16 Lifting Wedge

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning. The LW-16 only requires an access

gap of 10 mm. See our "Specialty Tools" section on [www.enerpac.com](http://www.enerpac.com).

Page: **61**

- Optimum match of individual components
- All sets are ready-for-use and include single-acting cylinder, two-speed pump, 1,8 m safety hose and gauge and adaptor
- Choice between handpump, air driven foot pump or cordless pump
- RC-Series DUO, General Purpose Cylinders: for maximum versatility
- RCS-Series, Low Height Cylinders: ideal where space is restricted
- RCH-Series, Hollow Plunger Cylinders: for pushing and pulling applications.

▼ Cylinder-Pump Sets – optimum match of components. The quickest and easiest way to start working right away.

# Single-Acting Cylinder-Pump Sets

## SET SELECTION:

- 1 Select the cylinder
- 2 Select the pump
- 3 Find the set model number in the gray matrix

## SELECTION EXAMPLE

### Selected cylinder:

- RC-106, Single-Acting cylinder with 156 mm stroke

### Selected pump:

- P-392, Lightweight hand pump

### Set model number:

- SCR-106H

### Included:

- HC-7206 hose
- GF-10B gauge
- GA-2 adaptor

## SC Series

Capacity:

**5 - 95 ton**

Stroke:

**38 - 362 mm**

Maximum Operating Pressure:

**700 bar**

### Power Box

Portable tool box with hand pump, gauge adaptor assembly, hose and RC-, RCS, RSM, WR or LW-Series cylinder.

<sup>1)</sup> With XA-12 air pump.

<sup>2)</sup> Cordless Pump includes 230V Charger. For 115V charger replace the "E" by the "B" in the model number.

# ATM-Series, Flange Alignment Tools

▼ From left to right: ATM-4, ATM-9, ATM-2 (ATM-9 shown without pump and hose)

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- Reduces set-up time: no need for chains, pulleys or rigs
- Safety strap helps provide secure operation
- Can be installed and used in any position
- Portable, lightweight design enables easy transport and use, even in remote locations.

▼ The compact ATM-2 is actuated by simply hand turning the crank.

## ATM Series

Minimum Bolt Size:

**16 - 31,5 mm**

Flange Wall Thickness:

**14 - 228 mm**

Maximum Lifting Force:

**1 - 9 ton (10 - 90 kN)**

### Adjustable Reach

The highly adjustable reach of the wing and drop leg on ATM-4 and ATM-9 allow precise alignment.

### ATM-9 Hydraulics

The ATM-9 includes P-142 hand pump and HC-7206C 1,8 m long hose. Enerpac recommend the use of the pressure gauge **GP-10S** and gauge adaptor **GA-4** for easy mounting of the gauge onto your system.

ATM-4

ATM-9

Maximum Lifting Force		Model Number	Minimum Bolt Size		Flange Wall Thickness		 (kg)
ton	kN		(mm)	(inch)	(mm)	(inch)	
1	10	ATM-2	16	.63	14 - 82	.55 - 3.29	1,6
4	40	ATM-4	24	.95	30 - 133	1.18 - 5.23	8,6
9	90	ATM-9 *	31,5	1.24	93 - 228	3.66 - 9.00	14,5

\* ATM-9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately).  
ATM-9 weight includes tool only.

# NC-Series, Single-Acting Hydraulic Nut Splitters

▼ Shown from left to right: NC-3241, NC-1319, NC-1924

- Compact and ergonomic design, easy to use
- Unique angled head design
- Two blade design (NC-D models) for time saving operation – nuts are split from two sides in one action
- Single-acting, spring return cylinder
- Heavy duty chisels can be reground
- Nut Splitters include spare chisel, spare set screw and wrench used to secure the chisel. A CR-400 coupler is standard.

Single Blade Models (NC)

Double Blade Models (NC-D)

## NC, STN Series

Hexagon Nut Range:  
**10 - 75 mm**

Bolt Range:  
**M6 - M48**

Maximum Operating Pressure:  
**700 bar**

**Tool-Pump Sets**  
Hydraulic Nut Splitters are available as sets (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Ordering Notes: Maximum allowable hardness to split is HRc-44. Not to be used on square nuts or stainless steel.

\* Available as Tool-Pump Set, see note on this page.

▼ NS-Series Hydraulic Nut Splitters

- Specially designed to suit standard ANSI B16.5 / BS1560 flanges
- Single-acting (spring return) cylinder
- Tri-blade technology provides three cutting surfaces on a single blade
- Interchangeable heads provide maximum nut range flexibility
- Preset scale allows controlled blade extension, which avoids damage to bolt threads
- Grip tape and handle included for more secure manoeuvrability
- Nickel-plated cylinder body for excellent corrosion protection and improved durability in harsh environments
- Internal pressure relief valve for overload protection.

▼ Heavily corroded and weathered nuts are quickly split and removed using a NS-Series Nut Splitter.

*Nut splitter set for joint separation during inspection, maintenance and decommissioning operations. ▶*

## Power and Precision High Performance Nut Splitter

### Blade Cutting Depth Scale

Adjustable cutting depth scale for controlled blade extension, which avoids damage to bolt threads. The scale indicates the

bolt range in metric and imperial values on each cutting head.

### Hydraulic Nut Cutters

The NC-Series models are available featuring an angled head design for 10 - 75 mm hexagon nuts.

Page: 65

### Joint Separation Tools

FS and FSH-Series flange spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 68

### Flange Alignment Tools

The ATM-Series provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 64

# Single-Acting Hydraulic Nut Splitters

## Nut Splitter Sets

To provide maximum flexibility, NS-Series Nut Splitters can also be ordered in sets (NS-xxxSy).

Select Nut Splitter size and pump style from the chart below.

To order additional Cutting Heads (NSH-xxxxxx), Cylinders (NSC-xxx) or Replacement Blades (NSB-xxx), see Selection Chart below.

## SET SELECTION:

**1** Select your Nut Splitter

**2** Select your pump type

# Hydraulic and Mechanical Industrial Spreaders

▼ FSH-14 and FSM-8 with safety blocks SB-1

- **Integrated wedge concept:** friction-free, smooth and parallel wedge movement eliminates flange damage and spreading arm failure
- **Unique interlocking wedge design** - no first step bending and risk of slipping out of joint
- **Requires very small access gap of only 6 mm**
- **Stepped spreader arm design** - each step can spread under full load
- **Few moving parts mean durability and low maintenance**
- **Safety block SB-1 and ratchet spanner SW-22 included with FSM-8**
- **Safety block SB-1 and RC-102 cylinder included with FSH-14.**

Maximum Spreading Force	Model Number	Tip Clearance	Maximum Spread <sup>1)</sup>	Spreader Type	Oil Capacity	
ton (kN)		(mm)	(mm)		(cm <sup>3</sup> )	(kg)
8 (72)	<b>FSM-8</b>	6	80	Mechanical	–	6,5
14 (125)	<b>FSH-14 *</b>	6	80	Hydraulic	78	7,1

<sup>1)</sup> Using stepped blocks FSB-1

\* Available as pump-tool set, see note on this page.

## FSH, FSM, STF Series

Tip Clearance / Maximum Spread:

**6 mm / 80 mm**

Maximum Spread Force:

**8 - 14 ton**

Maximum Operating Pressure:

**700 bar (FSH-14)**

### Stepped Blocks FSB-1

Use stepped blocks to increase wedge opening up to 80 mm. Fits both FSM-8 and FSH-14.

### Tool-Pump Set

The hydraulic flange spreader is available as set (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Spreader Model Nr.	Handpump Model Nr.	Set Model Number
FSH-14	P-392	<b>STF-14H</b>

### Cylinder-Pump Sets

Hydraulic cylinders can also be used to assist in pipe line positioning and aligning.

Page: **62**

▼ Flange maintenance and joint separation with FSH-14 Hydraulic Wedge Spreader.

# A, WR-Series, Wedgie and Spread Cylinders

▼ Shown clockwise from top: WR-15, WR-5, A-92

- Single-acting, spring return
- WR-5 hydraulic wedgie cylinder: for use in very confined work areas
- WR-15 hydraulic spread cylinder: for long stroke spreading applications
- A-92, Spreader attachment: threads on 10 ton RC-Series DUO cylinders (except RC-101 \*).

WR-5

WR-15

A-92

Cylinder Capacity	Tip Clearance	Model Number	Maximum Spread	Cylinder Effective Area	Oil Capacity	
ton (kN)	(mm)		(mm)	(cm <sup>2</sup> )	(cm <sup>3</sup> )	(kg)
1,0 (8,9)	12,8	WR-5	94	6,5	10	2,3
0,75 (6,0)	32,0	WR-15	292	14,5	64	11,3
1,0 (8,9)	35,0	A-92 *	158	–	–	3,6

\* Maximum system pressure must be limited to half the rated pressure (350 bar).

## A, WR Series

Capacity:

**0,75 - 1,0 ton**

Tip Clearance:

**12,8 - 35,0 mm**

Maximum Spread:

**94 - 292 mm**

Maximum Operating Pressure:

**700 bar**

### Power Box

Tool box with hand pump, gauge adaptor assembly, hose and RC-, RCS, RSM-Series cylinders, WR-5 or LW-16 cylinder.

Page: 61

### Best Match Hand Pump

To power your WR-5, WR-15 and A-92 Spreader attachment the P-392 Hand Pump is an ideal choice. See [www.enerpac.com](http://www.enerpac.com) or

the Enerpac Industrial Tools catalogue for the full range of hand pump options.

Page: 62

▼ A WR-5 hydraulic wedgie cylinder is used for maintenance on a bridge bearing.

# FF-Series, QuickFace – Mechanical Pipe Flange Face Tool

▼ Shown: FF-120

- Makes refacing easy – hand operated machine tool can be set up anywhere without the need for air, electric or hydraulic power
- Lightweight and portable (15 kg in storage box)
- Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range 25,4 - 304,8 mm [1 - 12 inch]
- Interchangeable collets for ID mounting range 25,4 - 152,4 mm [1-6 inch] allow the user to work on many different flanges with minimal time between set-ups
- Interchangeable lead screws suitable for refacing damaged raised-face (RF), flat-face (FF) or lens-ring joint flanges
- Tool body with expanding collets centers itself providing real concentric operation.

## ▼ SELECTION CHART

Pipe Flange Cutting Diameter Range		Internal Pipe Mounting Diameter Range		Cutting Resultant Roughness (Ra μ)	Model Number	 (kg)
(mm)	(inch)	(mm)	(inch)			
25,4 - 304,8	1,0 - 12,0	25,4 - 152,4	1,0 - 6,0	3,2 - 12,5	FF-120	6,8

## FF Series

Pipe Flange Cutting Diameter Range:

**ø 25 - 305 mm / 1 - 12"**

Internal Pipe Mounting Range:

**ø 25 - 152 mm / 1 - 6"**

Cutting Resultant Roughness:

**Ra 3,2 - 12,5 μ**

### Fine Thread Feed Screw

Fine Thread Feed Screw Accessory Kit **FF120FSF** is included as standard and provides a fine thread feed screw, 1/2"-20 UNF, and delivers a surface roughness of Ra 1,6 - 2,4 μ (60-100 micro inches).

### Joint Separation Tools

FS and FSH-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 68

### Flange Alignment Tools

The ATM-Series provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 64

▼ The Enerpac FF-120 QuickFace has same precision and quality of finish as a lathe.

## Enerpac 'Yellow Pages' stand for technical information!

If selecting bolting tools is not your daily routine, then you will appreciate these pages. The 'Yellow Pages' are designed to help you work with hydraulics. They will help you to better understand the basics of bolting system set-ups and of the most commonly used bolting techniques.

The better your choice of equipment, the better you will appreciate these tools. Take the time to go through these 'Yellow Pages' and you will benefit even more from Enerpac Bolting Solutions.

### Enerpac Warranty Statement

Visit our web site for the complete Global Lifetime Warranty or call your Authorized Service Center.

About Enerpac		88 ▶

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing. Enerpac worked hard to earn the quality rating ISO 9001, in its ongoing pursuit of excellence.

### ISO 1402, ISO 4672, ISO 6803

Enerpac thermoplastic hoses are related to the criteria set forth in these standards.

### ATEX 95 Certified

The ATP, ZA and XA-Series air pumps and S and W-Series torque wrenches are tested and certified according to the Directive 2014/34/EU "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous zone area 1), in gas and/or dust atmospheres. ATP, ZA and XA-Series air pumps are marked: Ex II 2 GD ck T4.

### Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 700 bar (10.000 psi) pressure unless otherwise specifically noted.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of the Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TÜV and by CSA, national recognized testing laboratories.

### EMC Directive

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2004/108/EC.

### CE Marking & Conformity

Enerpac provides a Declaration of Conformity and CE marking for products that conform with the European Community Directives.

### ASME B30.1-2015

Our cylinders fully comply with the criteria set forth by the American National Standards Institute (except RD, BRD, CLL, CLP and CLS-Series).

# Safety Instructions

When used correctly, hydraulic power is one of the safest methods of applying force to your work. And to that end we offer some DO's and DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

- Lift slowly and check the load often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them.

The line drawings and application photo's of Enerpac products throughout this catalog are used to portray how some of our customers have used hydraulics in industry.

In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs.

Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system.

Enerpac can not be held responsible for damage or injury, caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with instructions spelling out specific safety information. Please read them carefully.

## Bolting Tools

		Always use the proper personal protection equipment (PPE).			Never stand in-line with the bolt axis.
		Always check your system set-up and follow the correct bolting procedures.			Never stand in-line with the flange or pipe opening.
		Never stand in-line with the pressure, couplers or hoses.			Never hold pressurized hoses.
		The torque wrench (or tool) operator is always in charge.			Hold torque wrench (or tool) at handle only. Do not place any part of body between wrench and reaction point.

## Cylinders

		Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.			As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.
--	--	---	--	--	---

## General

**80%** Manufacturer's rating of load and stroke are maximum safe limits. **80%**  
**Good practice encourages using only 80% of these ratings!**

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Don't override the factory setting of relief valves. Always use a gauge to check system pressure.

## Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

## Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 60 millimetres. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off the ground through the couplers.

## Function of Bolts and Nuts

Threaded fasteners are used across industry to assemble products ranging from pipelines to heavy-duty earth movers and from cranes to bridges and many more. Their principle function is to create a clamping force across the joint which is able to sustain the operating conditions without loosening.

Correctly tightened bolts make use of their elastic properties, to work well they must behave like springs. When load is applied, the bolt stretches and tries to return to its original length. This creates compressive force across the joint members.

## Hooke's Law of Physics

## Behavior of Bolts and Nuts

Elasticity is defined in Hooke's Law of physics: The stress in a bolt is directly proportional to its strain. The stress-strain of a bolt has an **elastic range** and a **plastic range**. In the elastic range Hooke's Law is true.

All of the elongation applied within the elastic range is relieved when the load is removed. The amount of elongation increases when more load is applied. When a bolt is stressed beyond its **proof load** (maximum load under which a bolt will behave in an elastic manner), the elastic elongation changes to plastic deformation and the strain will no longer be proportional to the stress.

In the plastic deformation a part of the elongation will remain after the load is removed. The point where this permanent elongation occurs is called the yield strength. The further application of load takes the bolt to a point where it begins to fail this is termed its **ultimate tensile strength (UTS)**. At this UTS-point, if additional force is applied to the bolt it will continue to elongate until it finally breaks. The point at which the bolt breaks is called the **tensile point**.

Careful attention must be paid to the grade of bolt being used as bolt grades differ in the elastic range.

## Uniform preload (residual load)

1. Bolt loosens due to cycle loads of vibration.
2. Sealing face surface damage.
3. No compression.
4. Cracking.
5. Flange rotation.
6. Yielding of bolts.
7. Over-compression of gasket

## Preload

The main purpose of a bolt and nut is to clamp parts together with the correct force to prevent loosening in operation. The term **preload** refers to the loading in a bolt immediately after it has been tightened.

The amount of preload (residual load) is critical as the joint can fail if the load in the bolt is too high, too low or not uniform in every bolt.

### Uneven bolt loads can result in:

- Some bolts being loose while others are overloaded.
- Crushing of the gasket on one side, leakage on the other side.

Preload is normally dictated by the joint design, (see Enerpac Bolted Joint Integrity) for information on common joint types or contact your local representative.

## Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

### Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

### Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel. There are two main techniques: Torque tightening and Bolt tensioning.

### 1. Torque tightening

Achieves preload in a bolt and nut assembly via the nut in a controlled manner using a tool.

### 2. Bolt tensioning

Achieves preload in a bolt and nut assembly by stretching the bolt axially using a tool.

## Advantages of Controlled Tightening

### Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

### Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

### Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

### Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

### Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

### The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint are carried out the first time.

### Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment includes: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioners.

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

The screenshot displays the 'Torque Calculation' interface of the Enerpac software. It features a navigation bar with 'Calculations', 'Inquiries', 'Help', 'Contact Us', and 'Enerpac.com'. The main content area is divided into several sections:

- Calculation Information:** Includes fields for 'Tightening Method' (Torque/Tensioning), 'Nut/Nutset' (Standard/Insert), 'Pressure Units' (Psi/Barg), 'Lubricant', 'Locks', 'Standard', and 'Bolt Material'. It also has dropdown menus for 'Flange Size', 'Flange Class', 'Flange Material', 'Gasket', 'Joint Type', and 'Bolt Material'.
- Diagram:** A technical drawing of a flange joint with dimension lines.
- Diagram Values:** A table listing dimensions such as Bolt Hole Diameter, Flange OD, Bolt Circle Diameter, Total Flange Length, Flange Thickness, Weld Neck OD, and Pipe OD.
- Tightening Values:** A table showing Residual Stress, Bolt Load, and Torque.
- Selected Tool:** A section for tool selection, currently showing 'No Tool Selected'.
- Joint Data:** A table listing joint specifications like Joint Thickness, Gasket, Bolt, Min Bolt Length, and Bolt A/P.
- Material Properties:** A table showing Minimum To Seal, Yield Stress, Allowable Stress, % Residual Yield, Applied Stress, Applied Load, and % Applied Yield.

Visit [www.enerpac.com](http://www.enerpac.com) to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

## Torque Tightening

Turning movement

Stretch of Fastener (Pre-load)

Friction points should always be lubricated when using the torque tightening method.

Example of how a lubricant can reduce the effect of friction and convert more torque to bolt preload.

## What is Torque?

It is a measure of how much force acting on an object which causes that object to rotate.

## What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

## Torque Tightening and Preload

The amount of preload created when torquing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

**Preload (residual load) = Applied Torque minus Frictional Losses**

## Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload.

The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value. Lubricant or anti-seizure compounds should be applied to both the nut bearing surface and the male threads.

## Frictional Losses

**80%** Manufacturer's rating of pressure and torque are maximum safe limits. **80%**  
 Good practice encourages using only 80% of these ratings!

## Torque Procedure

When torquing it is common to tighten only one bolt at a time, this can result in Point Loading and Load Scatter. To avoid this, torque is applied in stages following a prescribed pattern:

## Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut
- Step 2** Tighten each bolt to one-third ( $\frac{1}{3}$ ) of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds ( $\frac{2}{3}$ ) following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

### Select the Right Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt more torque is usually required than when tightening.
- For general conditions it can take up to **2½ times** the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

### Conditions of bolted joints

- Humidity corrosion (rust) requires up to **2 times** the torque required for tightening.
- Sea water and chemical corrosion requires up to **2½ times** the torque required for tightening.
- Heat corrosion requires up to **3 times** the torque required for tightening.

### Minimum Output Torque

- The recommended minimum torque value of a hydraulic wrench is 10% of the maximum rated value.

### Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required. This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to **2½ times** the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

# Tensioning

## Tensioning requires longer bolts

**INCORRECT**

**CORRECT**

## What is Bolt Tensioning?

Tensioning is the direct axial stretching of the bolt to achieve preload. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

**Preload (residual load) = Applied Load minus Load Losses**

## What is Load Loss?

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

**The preload depends on Applied Load and Load Loss (load loss factor).**

## GLOSSARY OF TERMS

### Applied Load:

The load applied to a bolt during tensioning which includes an allowance for Load Loss.

### Bolt Tensioning:

A method of controlled tightening which applies preload to a bolt by stretching it axially.

### Breakout Torque:

The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

### Elastic Range:

The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

### Plastic Range:

The range on a stress / strain curve where the tensile load applied to a bolt results in permanent deformation.

### Load Loss:

The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

### Load Scatter:

The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

### Preload:

The load in a bolt immediately after it has been tightened.

### Proof Load:

Proof load is often used interchangeably with Yield Strength but is usually measured at 0,2% plastic strain.

### Tensile Point:

The point at which the tensile loading on a bolt causes the bolt to rupture.

### Torque Tightening:

The application of Preload to a bolt by turning of the bolt's nut.

### Ultimate Strength:

The maximum tension which can be created by tensile load on a bolt.

### Yield Strength:

The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

**80%** **Manufacturer's rating of pressure and load are maximum safe limits. Good practice encourages using only 80% of these ratings!** **80%**

## Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and

provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

### Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

## General Procedure

- Step 1:** The bolt tensioner is fitted over the stud.
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud (bolt).
- Step 3:** The stud's nut is wound down against the joint face
- Step 4:** Hydraulic pressure is released and the tensioner removed.

The bolt behaves like a spring, when the hydraulic pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

### Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

## Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened.

The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

### Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

\* Heavy hexagon nuts.

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturers instructions or engineering recommendations when making bolted connections.

### IMPORTANT

The hexagon sizes shown in the tables should be used as a guide only. Individual sizes should be checked before specifying any equipment.

### BSH-Series Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174;

DIN3129 and DIN3121 or ASME-B107.2/1995.

## Key to measurements

All capacities and measurements in the catalog are expressed in uniform values. The conversion chart provides helpful information for their translation into equivalent systems.

FDM Conversion Chart		
Inches	Decimal	mm
1/16	0,06	1,59
1/8	0,13	3,18
3/16	0,19	4,76
1/4	0,25	6,35
5/16	0,31	7,94
3/8	0,38	9,53
7/16	0,44	11,11
1/2	0,50	12,70
9/16	0,56	14,29
5/8	0,63	15,88
11/16	0,69	17,46
3/4	0,75	19,05
13/16	0,81	20,64
7/8	0,88	22,23
15/16	0,94	23,81
1	1,00	25,40

## Pressure:

1 psi	= 0,069 bar
1 bar	= 14,50 psi
	= 10 N/cm <sup>2</sup>
1 kPa	= 0,145 psi
1 MPa	= 145 psi

## Force:

1 lbf	= 4,45 N
1 klbf	= 1000 lbf
1 kN	= 1000 N

## Weight:

1 pound (lb)	= 0,4536 kg
1 kg	= 2,205 lbs
1 metric ton	= 2205 lbs
	= 1000 kg
1 ton (short)	= 2000 lbs
	= 907,18 kg

## Temperature:

To Convert °C to °F:  
 $T^{\circ}\text{F} = (T^{\circ}\text{C} \times 1,8) + 32$

To Convert °F to °C:  
 $T^{\circ}\text{C} = (T^{\circ}\text{F} - 32) \div 1,8$

## Volume:

1 in <sup>3</sup>	= 16,387 cm <sup>3</sup>
1 cm <sup>3</sup>	= 0,061 in <sup>3</sup>
1 liter	= 61,02 in <sup>3</sup>
	= 0,264 gal
1 US gal	= 3,785 cm <sup>3</sup>
	= 3,785 l
	= 231 in <sup>3</sup>

## Other measurements:

1 inch	= 25,4 mm
1 mm	= 0,039 in
1 ft	= 0,3048 m
1 m	= 3,2808 ft
1 in <sup>2</sup>	= 6,452 cm <sup>2</sup>
1 cm <sup>2</sup>	= 0,155 in <sup>2</sup>
1 hp	= 0,746 kW
1 kW	= 1,340 hp
1 Nm	= 0,738 Ft.lbs
1 Ft.lbs	= 1,356 Nm
1 kN	= 224,82 lbs

### Free Conversion Calculator

Visit [enerpac.com](http://enerpac.com) and download the free conversion calculator.

## Torque Conversion Factors

Units to be converted	International System - S.I. (Nm)	Imperial (Lbf.ft)	Metric (kgf.m)
1 Ft.lbs	1,356	1,000	0,138
1 Nm	1,000	0,738	0,102
1 kgf.m	9,807	7,233	1,000

### Pressure versus Torque

See the pressure versus torque charts for S and W-Series hydraulic torque wrenches.

# Pressure versus Torque S-Series

**Pressure versus Torque – S-Series Torque Wrenches**

Pump Pressure (bar)	S1500X	S3000X	S6000X	S11000X	S25000X

### Convert pressure into torque

The function of a hydraulic torque wrench, is to convert hydraulic pressure into torque. This chart is a “quick-reference” to help in determining what this conversion factor is.

If you do not find your torque and pressure values in the chart, then the following conversion formulas can be used to find your theoretical torque value.

The actual value may vary due to wrench condition and age.

$$T = P \times T_F$$

$$P = T \div T_F$$

Where: **T** = target torque  
**P** = pressure  
**T<sub>F</sub>** = theoretical applied torque

### Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment includes: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioners

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

# Pressure versus Torque W-Series

## Convert pressure into torque

The function of a hydraulic torque wrench, is to convert hydraulic pressure into torque.

This chart is a “quick-reference” to help in determining what this conversion factor is.

If you do not find your torque and pressure values in the chart, then the following conversion formulas can be used to find your theoretical torque value.

The actual value may vary due to wrench condition and age.

$$T = P \times T_F$$

$$P = T \div T_F$$

Where: T = target torque

P = pressure

$T_F$  = theoretical applied torque

## Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment includes: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioners

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

## Enerpac Bolting Service

Offering full bolting tool service and maintenance wherever you need it. We provide you with personalized bolting demonstrations and training,

and the bolting service vehicle is equipped to perform torque wrench and other equipment calibrations and repairs on site.

We can give you advice on the best solutions and the bolting tools that are most suited to your application, thus enabling safe and controlled performance of your bolting activities.

- On-site demonstrations of Enerpac bolting tools
- Repair and calibration services
- Training for the safe and efficient use of Enerpac bolting tools

## Schedule a Bolting Service Demonstration

Use the distributor search at [enerpac.com](http://enerpac.com) to find the nearest Enerpac bolting service van to schedule a demonstration. These distributors display the bolting service icon.

## At Enerpac, we are committed to safety

Unfortunately, serious incidents can happen on a job site. Nevertheless, such mishaps may be avoidable if workers pay attention to the hazards and potential

risks, and know how to use tools correctly. Whether you work in maintenance or production, power plant, shipyard, mine, shop floor or construction site; learning to use hydraulic tools safely is mandatory.

Our Goal Zero initiative is part of our global commitment to improve workplace safety. We are committed to achieve the Goal of Zero harm to customers and end-users of our products.

## Worldwide Catalogue Coverage

Enerpac Catalogues are printed in many languages. If your requirements call for product use in a different country, please send your request to the applicable country listed on [www.enerpac.com](http://www.enerpac.com) – the Enerpac catalogue of the country serving your specific market area will be forwarded promptly.

## WCC2015 The World Class Collection brochure

16 page brochure provides a selection of the most popular Enerpac industrial tools and solutions, collected from all categories.

## 9355 Integrated Solutions Capability Brochure

Enerpac's "Integrated Solutions" provides Heavy Lifting solutions to meet customer requirements for safe, precise control of movement and positioning of heavy loads.

## E328e Industrial Tools Catalogue

This 280 pages catalogue contains our full line of cylinders, pumps, presses, pullers, tools, valves and system components, bolting solutions and integrated solutions.

## E215e Workholding Catalogue

Offers innovative products and solutions to provide powerful clamping and positioning force to every type of manufacturing process. Workholding solutions increase product quality and production output.

Do you work with high-pressure hydraulic tools regularly or even every day? Operating such tools requires sound knowledge of how they work and this should be maintained.

**Effective use of these tools boosts safety and reduces risk - both for you as the operator and for the environment within which the tools are used. Having the right training will enable you to use the tools safely and properly.**

Enerpac Academy is our in-house training centre, set up exclusively for Enerpac business partners, Enerpac users and Enerpac employees: training programs ranging from tool expertise, repairs and maintenance, to safe operation of high-pressure hydraulic tools.

### **Putting theory into practice**

The training courses are interactive and benefit from a highly diverse program that puts the covered theory into practice right away. Our training services are grounded in many years of experience in providing and applying Enerpac tools.

### **Tailored training**

Enerpac Academy offers you the exclusive opportunity to train your (new) employees in making proper use of Enerpac tools. Our trainings can also be done on-site.

### **Safety training**

Safe use of Enerpac high pressure hydraulic tools, user and environmental safety.

### **Controlled bolting trainings**

Bolting tool theory, tool applications, hands-on training on safe and efficient use of torque wrenches, tensioners and pumps.

### **General hydraulic sales training**

Knowledge of hydraulics, hydraulic tools and applications. Tool repair training: Repair and maintenance of general Enerpac tools.

### **Application training**

Tool feature and benefits, tool application review, safe use of hydraulic tools and market information.

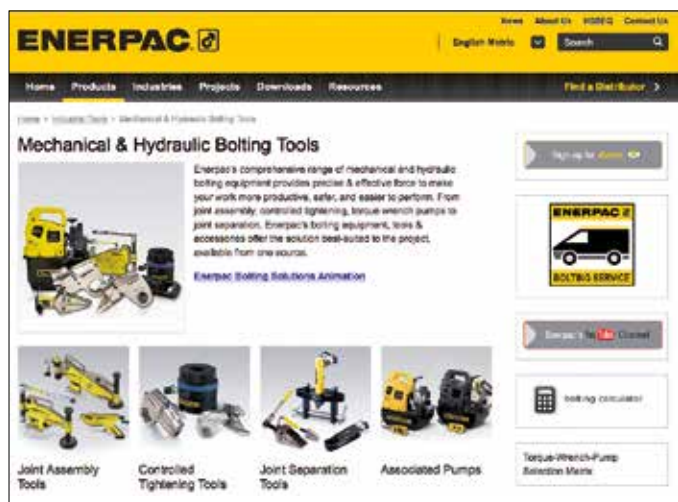

### **Enerpac Academy – The Power of Knowledge**

- Specialist in-house Enerpac training center
- Standard and tailored training programs
- Highly experienced trainers
- Selection of training courses with a proven (value adding) track record
- Knowledge and experience sharing
- User and tool safety come first.

### **EMP – Enerpac Maintenance Program**

EMP is a preventive maintenance program. Your Enerpac Authorised Service Centre will check the tools on essential points: leaking, oil level and quality, maximum pressure setting, and damage. EMP reduces operational risks, increases safety and minimises extremely expensive delays in your operations. You will be advised about regular maintenance of the Enerpac tools.

- Work more safely
- Minimise operational risk
- Ensure tools are always available and in tip-top shape
- As good as new after repair
- Prevent downtime
- Advice on safe and effective use
- Maintenance when tools are not used.

**Enerpac is the leading global provider of high-pressure hydraulic tools and solutions with a broad range of products, local expertise and worldwide distribution network. With a proven track record in a wide range of markets, Enerpac designs and manufactures high-quality tools and solutions for all industrial applications.**

Enerpac has gained unique experience in delivering hydraulic solutions for the controlled movement and positioning of heavy objects. Enerpac supports your business by offering the right solutions and service to help you get your work done efficiently and safely.

## Torque Calculation Engine

Enerpac's Bolting Calculator is our free web-based calculator designed to technically support our products. The software will calculate as well as recommend bolt load/stresses for your bolted applications. You may choose between torque or tension as your tightening method and all calculations include hydraulic tool pressures based on tool selection.

## Calculation Features

ANSI B16.5 & B16.47 Flanges  
API 6A & 17D Flanges
